- 35. (New) The method of claim 34 wherein the function of the patient is a sense of smell, and wherein the stimulation site comprises a sensory region of the cortex related to the sense of smell.
- 36. (New) The method of claim 34 wherein the function of the patient is associated with effectuating a sense of touch, and wherein the stimulation site comprises a sensory region of the cortex related to touch.
- 37. (New) The method of claim 34 wherein the function of the patient is movement of a body part, and wherein the stimulation site comprises a motor region of the cortex related to movement of the body part.
- 38. (New) The method of claim 34 wherein the function of the patient is cognitive processing, and wherein the stimulation site comprises a region of the cortex related to the cognitive processing.
- 39. (New) The method of claim 34 wherein the function of the patient is memory, and wherein the stimulation site comprises a region of the cortex related to memory.
- 40. (New) The method of claim 34 wherein the function of the patient has been impaired by damage to the cortex, and wherein selecting the stimulation site comprises choosing a stimulation site adjacent to the damaged region of the cortex where neural-activity for carrying out impaired function occurred before damage occurred to the cortex.
- 41. (New) The method of claim 34 wherein the function of the patient has been impaired by a stroke in the frontal lobe of the premotor cortex in the brain of the patient, and wherein selecting a stimulation site comprises choosing a stimulation site at the premotor cortex anterior to the stroke in the frontal lobe.
